1. Warehouse infrastructure :

A warehouse is a place where the company or its C&FA stores its finished goods and from time to time receives stocks from the factory/ mother godown and despatches the finished goods as and when the C&FA gets the order from distributor.

From the above definition, it is imperative to have warehouse on or near a highway so that it can receive the material from the factory/ mother godown as fast as possible and also it should have the proximity to the market it is serving.

Hence, the warehouse would be located outside the town and a near some transport area.

1.2 Essentials of a warehouse:

- 1.2.1. A warehouse should have a separate office space either concrete or wooden and a neat and clean toilet attached to it.
- 1.2.2. The floor of the warehouse should be made up of concrete only and should be smooth so that it does not hinder material movement.
- 1.2.3. Ceiling of the warehouse should be of RCC with roof light arrangement. In case the ceiling of the warehouse is of asbestos, it should have a false ceiling, which is to be insulated with glasswool. This is essential for the product like Center Fresh when due to high temperature liquid in the gum can start oozing out.
- 1.2.4. The warehouse should be properly ventilated with 3/4 ventilators on each wall.
- 1.2.5. Each warehouse should have pallets and the stocks should only be stored on to the pallets (recommended Plastic pallets). Also, this is one way of ensuring that the material stores is free from termites, pests, insects etc.
- 1.2.6. 'No smoking' policy should be strictly enforced with sign boards displayed at vantage positions.
- 1.2.7. There should be no open drains inside the warehouse.
- 1.2.8. At the fence gate, following boards should be displayed :
 - No unauthorised entry.

- No smoking inside the warehouse
- Registered office address & GST number
- Emergency contact information board.

In the event of an emergency a complete list of emergency contacts and phone no. must be displayed outside the warehouse :

Company
Location
C&FA agent
Name of contact
Phone No.
Regional office
C&FA
Fire Services
Nearest Police Station
Nearest Hospital

The same board should be displayed in local language also. Board must be fitted at a prominent place where everybody can see it.

- 1.2.9. A board displaying a message 'Goods stored in warehouse are the property of Perfetti Van Melle India Private Limited' should be prominently displayed.

2.0 Inventory record accuracy :

This aspect deals with measuring difference between book stock and physical stock.

Every depot do cycle count on daily basis. Apart from cycle count, full stock count will be done at least once in a month and report to be shared to Branch SCM.

If found any variance in stocks , depot will immediately report to branch SCM. And branch SCM team will take necessary approvals as per TOR and get the stock corrected in SAP. All deb would be on PTR (net amount would be recovered post adjustment)

Positive & Negative amount). In no case depot will send the interchange/short stock to DB/Chains.

3.0 Stock keeping policies :

3.1 Stock receipt: -

Stocks dispatched from MGD's will report to respective depot locations as per lead time. In case any vehicles not reported as per lead time, branch SCM will follow-up with HO-SCM/transporter.

Once the vehicle reported at depot location, CFA team should verify below points.

- Vehicle reporting date and time to be mentioned in the register.
- Vehicle number should match with the invoice documents. In case of stock received in any different vehicle, immediately it should be reported to the respective MGD and branch SCM team.
- Stock inward to be done in PANDO post unloading the vehicle completely and post verification of stock.
- Stock to be verified with Invoice quantity.
- In case of any difference in physical stock received with Invoiced quantity it should be informed to MGD and Branch SCM team. If any damaged cartons, same shall be booked in Pando as well.
- Branch SCM manager to check with MGD and arrange the clarification form MGD before taking stock inward.
- Interchanges stock correction to be done post approval as per TOR.
- In case of any shortage/Damage stocks observed while unloading stocks, such stocks to be kept separately and share the details with MGD with snaps. And initiate for insurance.

3.2 Stacking :-

It is very essential to consume the vertical storage space in order

accommodate more stock but this is generally restrained by stacking height norms so that there is minimal damage to bottom most cartons.

Stacking height norms are mentioned on cartons, same shall be followed

Each carton will have an instruction mark indicating the permissible stacking height for that brand pack. Maximum permissible height on the basis of bursting strength of the carton is written in unbracketted figs. However, keeping in view the loading and unloading, the recommended stacking height is given as bracketted figs.

During the monthly audit, audit should be conducted to ascertain whether C&FA is stacking the material in accordance to the norms.

All the stocks are to be stacked at least 1 ft. away from the warehouse wall

3.3 Warehouse layout :

In order to minimize the material movement and hence increasing the productivity of warehousing operations, it is essential to have an effective storage plan or warehouse layout. Floor of the warehouse should have marking in yellow showing the aisle space and space allocation for different brands.

A warehouse layout should be designed in such a manner that fast movers like Center Fresh / HD Wave STB should be stored close to loading/ unloading bay. Slow moving SKU's should be kept in some remote corner.

A separate space duly displayed with sign board should be earmarked for POP / Advt. material preferably POP material should put on racks.

The stocks of one brand should be stacked in either of the following fashion:

1. Old stock should be placed as a separate stack or on a different pallet with "GO" card and new stock with "STOP" card. PVMI has already shared table calendars to all depots with different cards like GO, STOP, AC, EXPIRED, NEAR EXPIRY etc
2. Old stock (but not near expiry stock) should be placed near the aisle so that picker picks it first and FMFO is compiled.

During the monthly audit, % of old stock should be calculated brand wise to ascertain FMFO compliance.

CCTV: Every depot should have CCTV Surveillances as per below guidelines:

- CCTV should be installed on each Dock from where handling of material can be monitored
- 1 CCTV should be installed in depot Office Area where Depot staff is located
- Atleast 2 CCTV should be installed in warehouse area from where stocks can be seen
- Access of CCTV should be available with BL.L
- Minimum 7 days to 15 days data storage should be there in DVR

3.4 Safety, hygiene and environment.

3.4.1 Warehouse fire protection

Since the warehouse will be carrying candies and chewing gums packed in a PET based wrapping material and put in a paper carton it is essential for the warehouse to have fire extinguisher.

According to Tariff Advisory Committee (TAC) guideline for every 100 sqm of floor area. 10 kg (ABC) or 6.5 kg (CO2) is required.

Sand buckets and extinguishers must be located at points easily approachable / accessible either on hangs or stands. (Near to loading/unloading point (4-5 buckets)

3.4.2 Medical emergencies :

There should be a first aid kit in the office of the warehouse and there should be atleast one trained first aider.

The first aid box should contain :

1. 6 small size sterilised dressing.
2. 3 medium size sterilised burn dressing.
3. 28 gm bottle containing savlon/ dettol liquid
4. One pair of scissors
5. A snake bite lancet (if available)
6. Antiseptic cream for burns (Burnol) and an antiseptic cream (Boroline)
7. 6 Band-aids.
8. 10 tablets of Crocin.
9. 1 packet of Glucose.

3.4.3 External lighting

Area around the warehouse should have enough light (street light or warehouse light) for good security.

3.4.4 Pest control

Pest Control should be carried by PVMI appointed agency, at least once a month to get rid of rats, termite etc.

Depot will take service report from such agencies and file the same at their end.

Any cobwebs on the walls should be cleaned once in a month. There has to be hard rubbers/foams below every shutter to avoid entry of pests.

3.4.5 Sanitation

The warehouse should be cleaned daily and should be free from dust and debris. The warehouse should be whitewashed once in every three years.

3.5 First Manufactured First Out (FMFO) :

It is imperative to understand that since the Company is in the business of food products, it becomes essential for the Company to ensure that only fresh and no old products are available in the market place. To ensure this, it is therefore, necessary to strictly implement the principle of First Manufactured First Out.

The above implies that stocks with earlier manufacturing date have to be despatched before the stocks with a later manufacturing date. e.g. if a depot is carrying Big Babol stocks with manufacturing date as July 22 and September 22, it must be ensured that stocks of July 22 should be despatched before September 22 stocks.

Similarly, in case of any stock returns, if the stocks returned are of a manufacturing date earlier than the stocks lying in the godown (and are in a saleable condition), such returned stocks must be despatched before the stocks of a later manufacturing date.

3.6 POP MATERIAL:

What the CFA must do:

- Despatch of correct quantities to the respective distributors along with their Invoiced Stock or otherwise in case of urgency.
- Proper storage of POP material ensuring segregation of different forms of POP.
- Delivery challan to be prepared for every POP dispatch. And share the delivery challan numbers on monthly basis to Tax team for updating the same in GST returns.

3.6.1 Allocation of POP :

The basic responsibility of allocation of POP to various distributors lies with the Regional Trade Marketing (RTM) Team. A specific allocation ratio is given in advance by the RTM for the various POPs or can be enquired once a new type of POP is received. T

allocation is primarily based on no. of outlets serviced by the distributor and the size/importance of the market. Despatch can be done either in a separate carton or in one of the cartons containing stock invoiced to the distributor. In latter case , proper marking to be put on such carton so that DB can easily identify the same and POP can be taken out.

3.6.2 Managing despatch of POP :

Care should be taken to despatch the POP of the correct language to respective distributor and secondly when a POP is in a series then it is very important that the correct sequencing is maintained to prevent confusion in the market.

3.6.3 Storage :

The POP material should be properly segregated and kept in specific space earmarked for each POP.

Another control format has to be maintained at the depot controlling the POP material given to each distributor from SAP

4 Order:

4.1 All the GT orders are to be received through CRS system on mails to depot directly. The depot will fetch the order through the reference no mentioned on the CRS order in SAP.

4.2 Depot will check that the SKU codes & qty are as per the current active stock masters & amendments to be done accordingly.

4.3 Depot strictly needs to adhere to the CRS orders & below are some exceptions which needs to be followed by depot as per approvals.

- Any changes in CRS order to be approved by BSM.
- Top up order over and above CRS order will be approved by BSM only.
- Among CRS order – Range to be billed first, after that hi selling SKU's like Centre Fresh/Fruit to be billed totalling 1

to FTL load in case of FTL billing. In case of constraint SKUs, depot to consider ASM's Allocation for allocating stocks to Distributors.

- Manual order: In case of any technical challenges in generating CRS order, manual orders are to be approved by BSM & AD-sales and time will be considered for approved manual order.
- OT chains PO's will be received by COP's team and after verification by COP's PO's will be shared to CFA's for billing.
- MT DB's will be sharing the orders from their registered mail id to CFA's

5.0 INVOICING :

Invoicing will be done to NEFT/RTGS, DCF, NACH, Credit customers.

- NEFT/RTGS receipt details will be shared by Finance team. CFA need to process orders post receiving the fund in customer account.
- DCF : DCF customer orders to be saved in SAP and every 1 hour the orders will process for auto payment. And post receiving the credit in customer account CFA can process order for invoicing.
- NACH : NACH customers credit limit will be maintained by Finance team. Based on the available limit invoicing can be done to NACH customers.
- Credit customers : OT customers billing will be done on approved credit limit (as per TOR) maintained by Finance team.

E-Invoicing / E-Way bill to be generated before dispatching the stocks.

5.1 Despatches:

- All orders (with available fund, allocation and approval received by 1pm shall be invoiced by 2pm and dispatched

12

same day.

- Orders received after 1pm to be invoiced same day and to be dispatched within 24 hours.
- CFA to ensure that all relevant documents are in place before dispatching stocks. (Invoice, E-Invoice, E-Way bill)
- Vehicle hygiene to be checked before loading of stock from depot.
- While dispatching stocks truck-out process to be done in PANDO. In every case Truck out date & e way bill date has to be matched 100%.
- If depot is facing issue in truck out in PANDO, then same needs to be immediately highlighted to PANDO team (support@pando.in) and branch SCM. (Depot will do the physical dispatch post exceptional approval from BLL & do the Truck out in system with in either 24 hrs or on system gets up (whichever is earlier)

5.2 Deliveries:

In case of deliveries to local distributors, the CFA must obtain signatures of the distributor or his authorised receiver. For upcountry distributor, the CFA must obtain Proof of Delivery from the transporter. DB should take 100% invoices in Botree with real time receiving.

Depot team has to ensure that transporter will provide OTP to DB if material is late/short delivered/interchanged/damaged. OTP will be treated as acknowledgement from depot as well.

If material is to be delivered to DB in partial consignments due to location of DB, then OTP will be provide after receipt and reconciliation of full stocks to DB.

Lead time will get started from Date of invoice (if order/fund/allocated stocks are available before 01:00 pm) otherwise from next working day. transporter has to ensure material delivery in sellable condition.

In case of CFA fails to achieve 95% Service level in consecutive 3 months, Deductions would be imposed as per below table:

Service Level	Impact on Freight Amount
95% and above	No impact
91% to 94.9%	1% of month freight of Transporter will be deducted
87% to 90.9%	2% of month freight of Transporter will be deducted
83% to 86.9%	3% of month freight of Transporter will be deducted

Above mentioned deductions can be ignored, in case of any climatic challenge, Govt. rules, or any challenge which is not in direct control, approval for exception should be in place from National Logistics Lead.

6.1- Primary Shortage :

All shortage from MG would be treated as per above mentioned insurance policy

- CFA has to ensure 100% booking of stocks in system via Pando (TMS)
- If any shortage reported by CFA, it should be supported by OTP which transporter
- CFA has to mention remarks on POD
- All shortage should be matched with POD
- If any discrepancy found between shortage booked in system & POD, lesser shortage would be treated & difference would be recovered from CFA

6.2 Insurance:

The Company will undertake insurance covers for stocks at the godown and in-transit stocks. The insurance cover for godown stocks, include stocks at the godown address mentioned in the policy, therefore, it is essential that the stocks are stored only in the godown address specified in the policy. The location of the godown or obtaining additional godown can be made ONLY with legal agreement signed as per TOR. The request for such change/additional godown should be routed through the Branch Finance by Branch Logistic Leads.

6.3 INSURANCE CLAIM PROCEDURE

The insurance claim can be filed for stocks which are damaged.

At the time of receiving stocks from the Mother Godown and/or from any depot of the Company, if a shortage/damage is found, following steps will have to taken by the CFA:

- Assess the value of such shortage/damage. For valuation purposes, the rate mentioned in the Stock Transfer Note is to be taken as the basis.

If the loss value < Rs.80000/- (MRP Value) :

Unload the stocks and mention the fact on reverse of LR and also obtain driver's signature on the LR.

Damage value is in between 20000/- to 80000/- survey report not required. We can submit the Insurance claims without survey report.

If the loss value > Rs.80000/- (MRP Value):

Damage value is in between 20000/- to 80000/- survey report not required. We can submit the Insurance claims without survey report.

>80k damage stocks -Unload the material preferably in presence of insurance surveyor, in case the above is not possible, unload the material and arrange for insurance survey immediately. It is worthwhile to mention here that an insurance survey report is the critical document for claiming the refund from the Insurance company. Hence, the survey should be arranged without any delay. Below is simple matrix to understand the requirements

Shortages

Following documents to be sent to H.O/Designated person by PVMI for handling insurance documentation.

- Consignee copy of the LR (original)
- Stock transfer note (original)
- Shortage/damage/ open delivery certificate given by the transporter
- Insurance survey report
- Survey fees bill (original)
- Surveyor's receipt (original)
- Photographs of the damaged stocks (original)
- Calculation of the estimated loss
- FIR report (original)
- FR report from court (if required)

The receiving CFA will store the damaged goods separately identified, till the time a written communication is received from the Company to dispose off such stocks.

In case of any shortage/theft FIR copy is mandatory for claiming insurance.

7. STOCK TRANSFERS:

7.1 Inter-Depot stock transfer :

Following must be ensured at the time of inter-depot stock transfer :

- All requests must be come from TM, Planning, Sales (in case Sales, alignment of TM or Planning should be in place). Branch logistics should be there in each communication
- Stocks are kept separately identified as per PKD dates.
- Stock Transfer Note (Intra-state) / GST Invoice (Inter-state) to be generated.
- Stocks are loaded in the transportation vehicle.
- Stocks should be sent only through the transporters with whom the Company has an agreement for such destinations. Otherwise, the transporter must be approved by logistics/Branch.

The receiving depot must ensure the following :

- Take delivery of the stocks and check for any shortage/damage.
- In case of any shortage/damage, the CFA will take an open delivery and obtain a certificate from the transporter to that effect. Shortage/damage claim should be raised immediately. Following must be ensured after the inter-depot stock transfer:
- All the documents i.e. the Stock transfer approval, Stock transfer note, LR copy are filed serially and properly

7.2 Inter-branch stock transfer :

Same procedure as in "Inter-depot" stock transfer.

8.0 STOCK RETURN - EX DISTRIBUTOR :

- As per Company policy no stock return can be accepted by the depots unless approved by Director sales.

8.1. Stock Return from Organised Trade Chains/Distributors

- Stock Return Note from the OT Chain/ Distributors to be sent to branch logistics team on receipt of stocks and copy of the same to be filed in depot for future verification.
- Stocks mentioned in the stock return note should be matched with the stocks received any discrepancy should be informed to branch logistics immediately.
- Branch SCM team will take approval from AD-Sales(OT) and take the sales return in SAP.
- All Reverse entries should be taken in SAP with in 7days from date of receipt at depot.

9.0 Stock destruction:

The Company may from time to time decide on destroying certain stocks which may become old. A written communication in this respect will be sent from the branch SCM (after required approvals as per TOR) to the CFA.

Action to be taken by the CFA :

- Such stocks must be kept separately identified and the words "DAMAGED STOCK - NOT FOR SALE" should be displayed.
- Branch Logistics Lead will travel to depot along with third party auditor to count material specially blocked stock
- Approval from MD towards write-off should be shared by NLL
- BLL would ensure that only approved material should get destroyed
- BLL & third party auditor would count the material & PKD of material (PKD would be for material which got expired)
- Format as per annexure -II should be filled & signed by BL Auditor, Depot Manager / CFA

1st Approval

2nd Approval : A

- Any deviation to be recovered from CFA on PTR basis
- In case of third party is not available, branch finance or sales can join for counting

Stock destruction to be done through certified vendor (approved by legal) with active agreement.

10.0 Physical verification of stocks :

10.1 Monthly verification :

A physical verification of the stocks will be conducted each month, by the depot manager. Explanations for the differences, if any, will have to be provided by the CFA. It is the primary responsibility of the CFA to ensure that no shortages occur. Loss on account of any such shortages will be borne by the CFA. Along with stock verification stock aging to be done and shared with branch SCM team on monthly basis.

10.2 Quaterly verification :

A physical verification of the stocks will be conducted on quarterly basis, by the stock auditors appointed by the Company. Explanations for the differences, if any, will have to be provided by the CFA. It is the primary responsibility of the CFA to ensure that no shortages occur. Loss on account of any such shortages will be borne by the CFA.

In case of CFA is not agreeing on the stock differences identified by stock auditors, CFA need to sign the document with his remarks on difference of opinion. Stock re-audit will be conducted by Finance and SCM within 30 days of such cases. And based on the re-audit, recoveries will be made from CFA in case of any discrepancies identified in re-audit.

In case of any repetitive case identified on CFA not agreeing on stock audit report stock differences, recoveries will be made as per the audit report without further delay.

Stock difference and recovery entries to be posted within 10 days from the stock audit. (All approvals to be in place as per TOR)
