

Dedicated Dock Owners for Operating Dock Leveler.

Idea Initiated by Naresh Patil
Jan-26

CONCEPT

Before CI: No dedicated dock owners, unauthorized persons operating dock leveler

After CI: Assigned authorized person of every dock & poster pasted at every dock containing image of dock owner & safety guideline.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

- Restricted access of unauthorized person from operating dock leveler
- Ensuring dock safety .

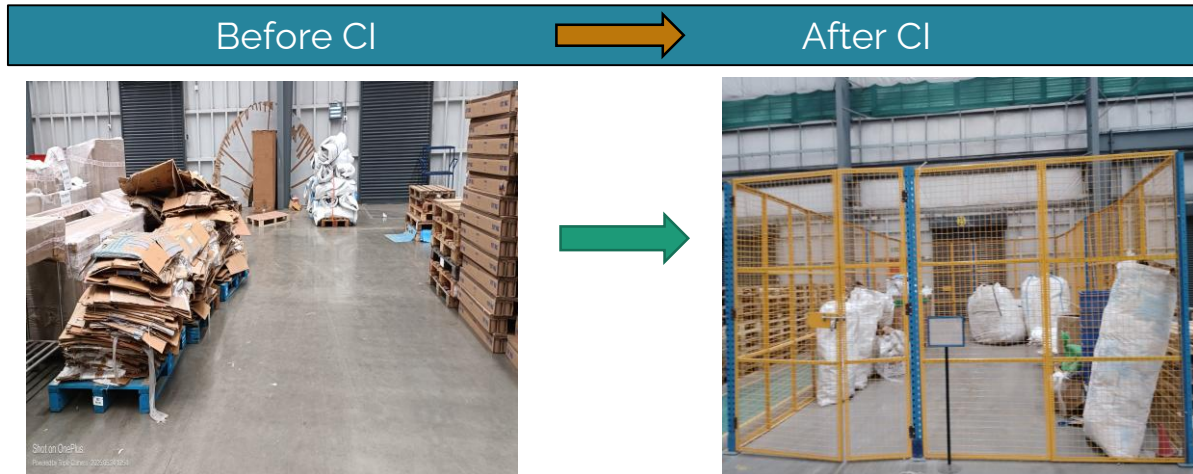

Dedicated Place to Keep the daily scrap material.

Idea Initiated by Nikhil Patil
Jan-26

CONCEPT

Before CI: No dedicated place to store daily scrap material.

After CI: Got dedicated place for scrap material away from finished goods.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

- Eliminated risk of pests infestation.
- Systematic way to keep the scrap material.

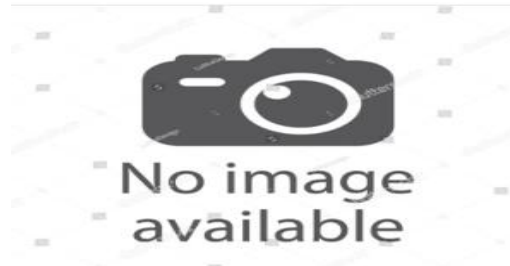

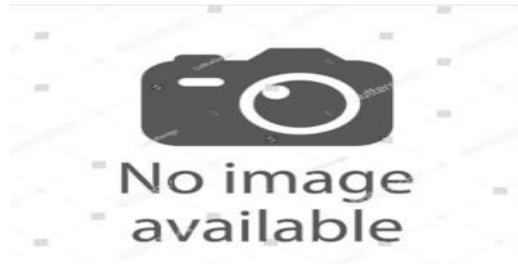

Dedicated manpower for Rack Inspection

Idea Initiated by Nitin Chavhan
Jan-26

CONCEPT

Before CI: Regular and accountable inspection.
Accurate and consistent updating of pest sighting register.

After CI: Assign this work only for checkers who are assigned to work near racks.
assign 3/4 racks to one checker.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

Regular and accountable inspection.
Accurate and consistent updating of pest sighting register.

Change Sitting for Quality person

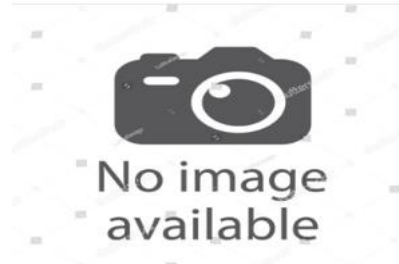

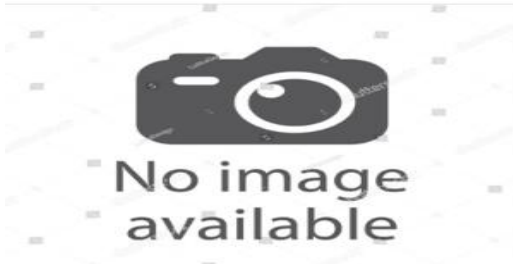

Idea Initiated by Nikhil Patil
Jan-26

CONCEPT

Before CI: Reduced response time for addressing minor quality issues on the floor.

Improved coordination between quality and operations.
Better real time monitoring and quicker decision making

After CI: Make sitting at floor.

Reduced response time for addressing minor quality issues on the floor.
Improved coordination between quality and operations.
Better real time monitoring and quicker decision making

High

GAINS

Previous day issue at morning TBT due to which less chances for error reduced.

As the employees have a fresh mind during morning time, good grasping power.

Safety Ergonomics

Idea Initiated by Rupesh Raut
Feb-26

CONCEPT

Before CI: 1. Safety & Ergonomics

Clear lane demarcation improved visibility and movement flow

Reduced chances of collision and wrong parking

Less physical strain and operator confusion

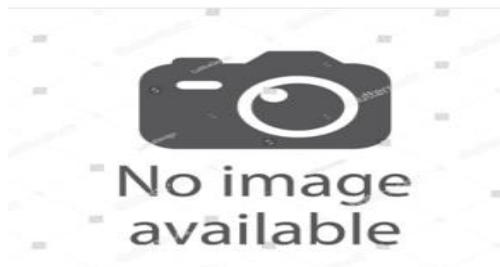

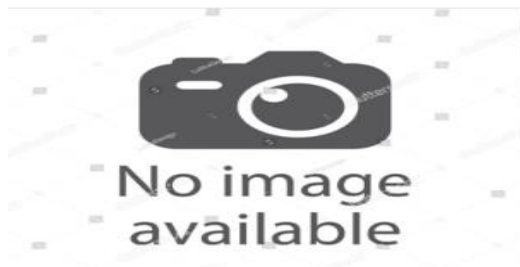

Eliminated vendor charges

Used internal manpower and available materials

Faster execution

Better traffic discipline inside warehouse

After CI: White-collar staff planned and executed color marking of VNA and Forklift lanes inside the warehouse using in-house resources instead of a vendor.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

1. Safety & Ergonomics

Clear lane demarcation improved visibility and movement flow

Reduced chances of collision and wrong parking

Less physical strain and operator confusion

2. Cost Saving

Eliminated vendor charges

Used internal manpower and available materials

3. Operational Improvement

Faster execution

Better traffic discipline inside warehouse

Dedicated Box to Damage material.

Idea Initiated by Vaishnavi Karangale
Apr-26

CONCEPT

Before CI: Mixing Of all damage material.(Sales Return,Consumer complaints, Outbound Material)

After CI: created separate boxes for these material categories.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

- Avoid confusion in 3 category material.
- To reduce time spent on packing damaged goods

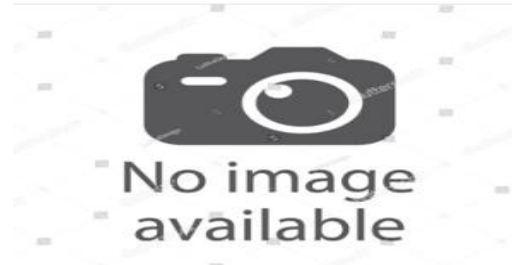

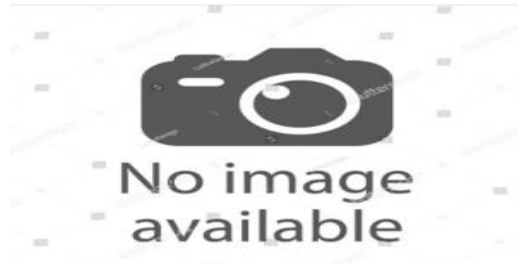

Dedicated Place For Kitting & Bundling Activity

Idea Initiated by Prashant Mhatre
Apr-26

CONCEPT

Before CI: No dedicated place for kitting & bundling activity, movement of material from one place to another, loss of productivity & Inventory loss

After CI: Assigned dedicated place for kitting by taking approval from customer

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

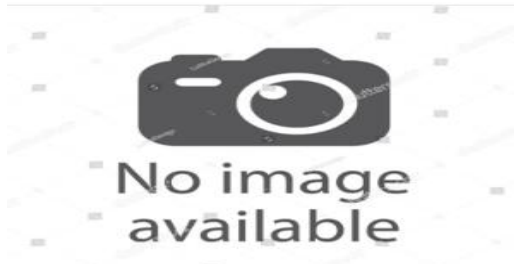

- Increases productivity, No daily hassle for material movement.

CONCEPT

Before CI: Workers were facing difficulty understanding assessment and guidelines in English. Most of workers understand Marathi and Hindi better than English which created communication gaps and affected assessment performance.

After CI:

1. Better understanding of assessment questions and work instructions.
2. Improved employee participation and confidence.
3. Team-wise evaluation based on actual job responsibilities
4. Improved training effectiveness and operational accuracy.
5. Better compliance and employee performance.

Bagging Team Questionary

Ⓢ Ⓣ Ⓤ ∞ √

This form is prepared to simplify data collection and communication regarding training evaluation of bagging team at MDP-3.

Name: _____

Short-answer text _____

पॉलीबैग प्रयोग को तो क्या कहें?

- ☐ जवनदुवारी जखी
- ☐ घसी मगदुम नन पॉलीबैग लें
- ☐ आस फेक करे

पॉलीबैग अजरी तरह बंद कयें कयना पाहिऐ?

- ☐ दिखाने के लिए
- ☐ पूरा और मंदी से बचाने के लिए
- ☐ जखी कसम खसम कराने के लिए

S Q D C I P E

1 Month

COMPLEXITY

Low

High

GAINS

- Increase the awareness on floor.
- Improves productivity in daily work.
- Better understanding of their job responsibility

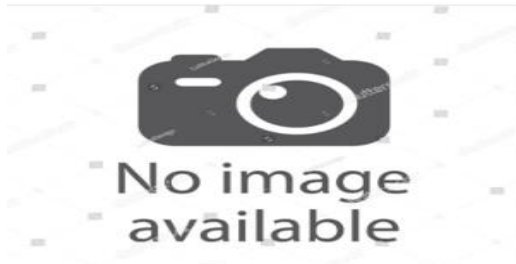

2.Create Near Miss Board Visual Inspection in warehouse

Idea Initiated by Vishal Wagh
May-26

CONCEPT

Before CI: A near miss went unreported due to a lack of accessible reporting forms and links, visualization within the warehouse facility.

After CI: Begin reporting near miss & increase the count.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

- Increase the Near miss count.
- Employees start to report near miss easily with help of scanner.

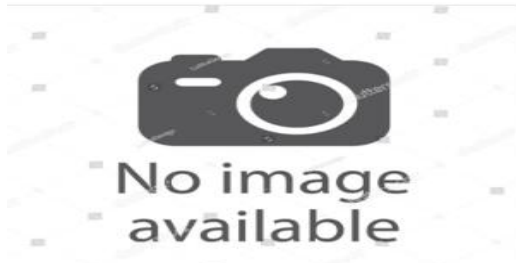

Department wise Dedicated Place For Empty Pallets.

Idea Initiated by Nitin Chavan
May-26

CONCEPT

Before CI: Empty pallets are taking up too much space, and workers are wasting time trying to find them.

After CI: This will reduce the time spent searching for pallets, free up valuable space, and strengthen safety protocols.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

- This will reduce the time spent searching for pallets, free up valuable space, and strengthen safety protocols.

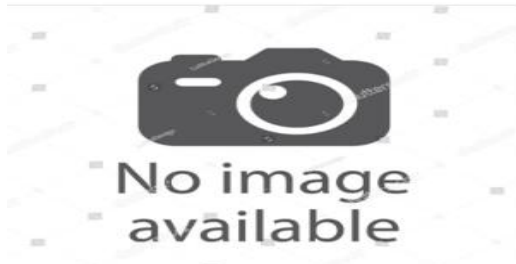

Visualization for Hygrometer

Idea Initiated by Vaishnavi
Karangale May-26

CONCEPT

Before CI: Difficult to search Hygrometer in warehouse due to small size.

After CI: Paste the colorful signages & mentioned name .

FM LOGISTIC

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

- Easy to search Hygrometer in warehouse.

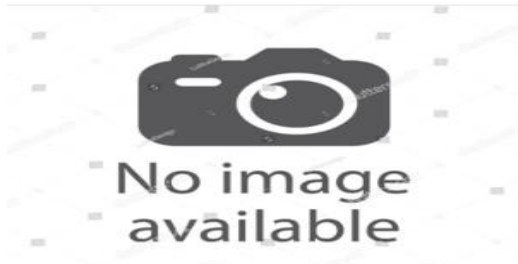

Fixed the location for Rodabox

Idea Initiated by Monali Patil
May-26

CONCEPT

Before CI: Rodabox misplace, damage due to operational activity.

After CI : Paste the Rodabox number on wall, Demarcation for rodabox, fixed with screw on floor.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

- Avoid chances of damage, misplace from designated location. Easy to identify during audit.

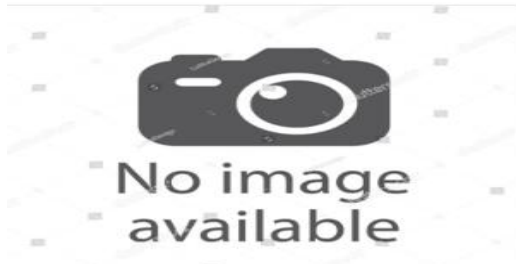

Permanent Crates for Ratchet belts

Idea Initiated by Prashant Mhatre
May-26

CONCEPT

Before CI: Box get damage due to continuous movement, very difficult to handling during operation.

After CI: Placed the Crates instead of carton box for ratchet belts.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

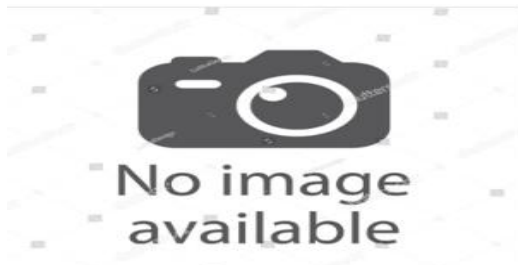

GAINS

- Saved the Box for ratchet belt storage.

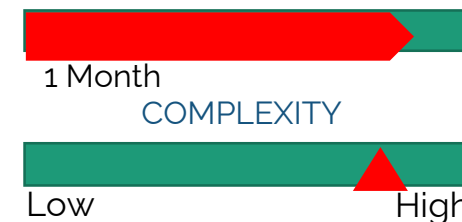

Idea Initiated by Akshay Sawant
June-26

Before CI: Difficult to planning for dispatch, Transportation, Picking, manpower.

After CI: Start to publish the Dispatch plan in group with all stakeholders.

[illegible]

TIME IMPLEMENTATION

- Picker & Loading Supervisor Load.
- Time-Consuming.
- Easy Work Management
- Securing On-Time Delivery.

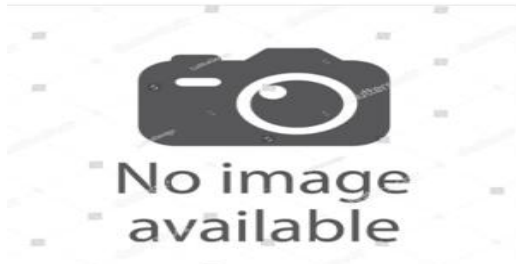

2. Demarcation Of No Storage Area.

Idea Initiated by Mohafiz Shaikh
June-26

CONCEPT

Before CI: No proper demarcation, no space between wall & Product storage.

After CI: Demarcated all area & paste signage "No storage area". for visualization.

FM LOGISTIC

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

- Promote workplace safety, Follow guidelines and enforce safe storage standards..

3.Start Internal Sampling G-Form for Operation team

Idea Initiated by Hitesh Gangurde June-26

CONCEPT

Before CI: Facing a lot of short and excess cases from customers in each period.

After C I: Start to publish Internal sampling G-form for operation team.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

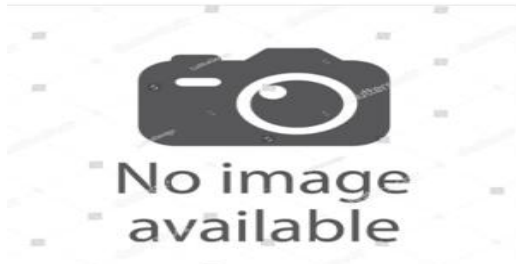

Low

High

GAINS

- Decrease inventory short & Excess cases from customers.
- Identify process defaulters.

A screenshot of the 'Supervisor Sampling Form' with fields for Email, Name, Date, and TO/DO. The form includes instructions and a link to switch accounts.

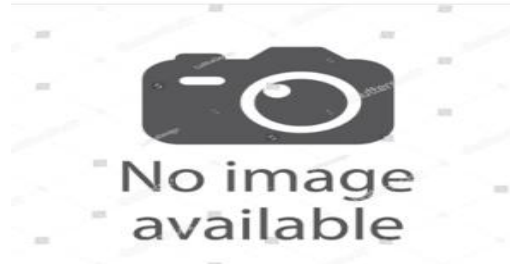

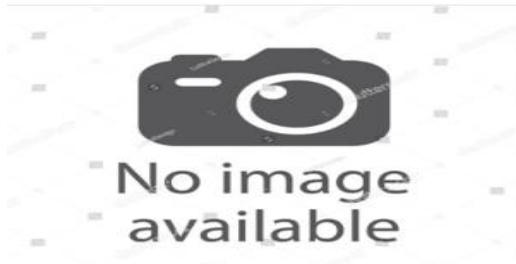

4.Partition for Pallets Merging of boxes& cans during loading

Idea Initiated by Naresh Patil
June-26

CONCEPT

Before CI: Difficult to identify different SSCC codes Product on same pallet.

After CI: Place a blue sheet between two different SSCC products.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

- 1.Easy to identify.
- 2.Avoid Confusion
3. Space utilization in vehicle.

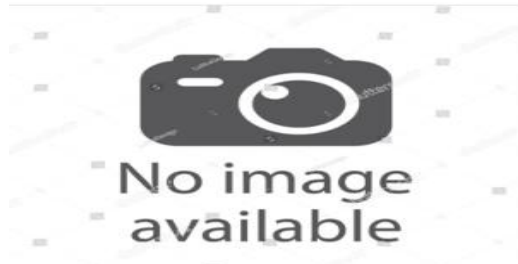

5. Cost Saving for Water cans

Idea Initiated by Priyanka Patil
June-26

CONCEPT

Before CI: Purchasing water cans from external suppliers. ₹9,000 monthly expense on external water cans.

After CI: started refilling the water cans using our in-house water facility.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

This initiative has resulted in a monthly cost saving of approximately ₹9,000, leading to an estimated annual saving of ₹108,000.

6. Cost saving for Beverages & Tea

Idea Initiated by Priyanka Patil
June-26

CONCEPT

Before CI: The monthly cost of providing tea was approximately ₹30,000.

After CI: In summer, we discontinued the tea service and introduced juice as an alternative beverage option.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

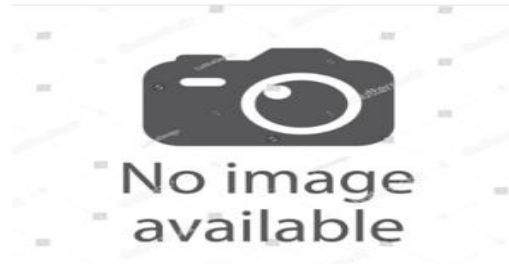

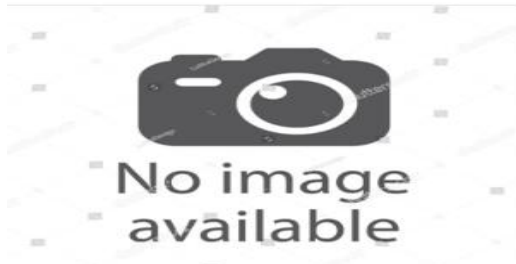

COMPLEXITY

Low

High

GAINS

The monthly cost of providing tea was approximately ₹30,000, whereas the juice program costs only around ₹12,000 per month, resulting in a monthly saving of approximately ₹18,000.

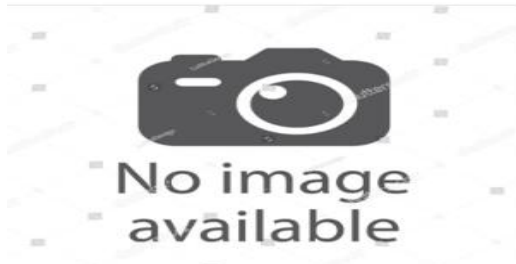

7. Barricading For VNA Charger point

Idea Initiated by Priyanka Patil
June-26

CONCEPT

Before CI: The lack of space between VNA Charger point and cardboard boxes materials is a major fire hazard because it allows heat to trap and fire to spread rapidly.

After Ci: Reduce the risk of fire.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

- Improve safety by reducing fire hazards.

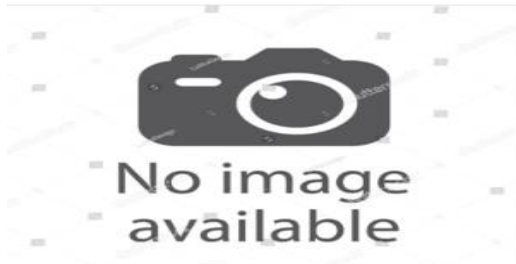

8. Provide Anti-Fatigue Mats For Workers in labelling area

Idea Initiated by Priyanka Patil
June-26

CONCEPT

Before CI: Employees in the labeling area work standing up continuously, causing fatigue.

After Ci : Provide anti-fatigue mats for the standing work areas.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

- Reducing employee fatigue improves overall workplace productivity.

9. Waste Segregation In Labelling Area

Idea Initiated by Nitin Chavhan
June-26

CONCEPT

Before CI: Mixed disposal of butter paper(MRP label waste),shrink wrap led to inefficient waste management, increased housekeeping sorting time, and reduced recycling effectiveness.

After Ci : Employees were trained to dispose of waste in the designated crates at the source. Implemented separate waste collection crates with identification signages for butter paper and shrink wrap to ensure proper waste segregation at the point of generation.

S Q D C I P E

TIME IMPLEMENTATION

1 Month

COMPLEXITY

Low

High

GAINS

1. Improved waste segregation and disposal process.
2. Reduced housekeeping time spent on manual sorting.
3. Better compliance with environmental and 5S practices.
4. Increased employee awareness of proper waste disposal.
